VENTRAC

May 2010

Product Feature
REAR DISCHARGE MOWING DECKS

Rear Discharge Advantage: Cut materials are discharged to the back of the mower instead of your pond or flower bed.

MOW TO PERFECTION WITH VENTRAC

*Ventrac rear discharge finish mowers give you a **high performance cut** along with **professional striping** for your lawn. With no side chute in the way, it is easier to maneuver around trees, landscaping, buildings and other obstacles. Rear discharge mowers will send the grass out the back of the mower and keep debris away from buildings, landscaping or sidewalks areas, while still creating a professionally cut lawn.*

Why use a Ventrac rear discharge mowing deck?

- Ability to mow close to objects with no side chute in the way
- Keeps cutting debris out of landscaping, paths or roadways
- Designed to minimize windrowing
- Deep deck design allows better airflow and a clean cut
- Ideal for roadsides or sidewalks where bystanders may be present
- Saves time and allows for trimming from both sides of mower
- Easily converts to a mulching mower with optional bolt-in mulch kit
- No thrown debris out the side of mower
- Better discharge spreading width than most mowers of its kind

Rear Discharge mowing decks are available for both the 3000 and 4000 Series Tractors.

MC600 Finish Mower Deck
For 4000 Series Tractors

Width of cut	60"
Cutting height	.75" - 4.5"
